CAREER OBJECTIVE

Motivated B.Tech Information Technology student seeking an entry-level role as a Data Scientist, Backend Developer, or Full Stack Developer. Skilled in Python, JavaScript, and modern web frameworks, with hands-on experience building full-stack applications and working on applied AI/robotics projects. Eager to apply strong problem-solving skills to real-world engineering challenges.

EDUCATION

B.Tech in Information Technology

Panimalar Engineering College

Expected 2028

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: Django, React, Node.js, Next.js, Tailwind CSS

Databases: MongoDB, MySQL, NoSQL

Tools: VS Code, Git Bash, GitHub, PyCharm

PROJECTS

Portfolio Website | *Next.js*

- Built a personal portfolio site showcasing background, experience, and past projects.
- Designed a clean, responsive interface to present information clearly to recruiters and collaborators.

ReconRaccoon | *Python, React, Tailwind CSS*

- Developed a web tool that retrieves domain WHOIS information, public HTTP headers, and IP address for any given link in a single unified interface.
- Eliminated the need for separate WHOIS libraries or multiple third-party tools by consolidating all lookups into one dashboard.

EXPERIENCE

LLM Developer (Intern) — IIT Madras

2 Months

- Developed an LLM-based system enabling a robot to identify and track a specified item in real time.
- Assembled a mini robot from hardware components and integrated it with the software pipeline.
- Implemented wireless control of the robot using an MQTT broker for real-time command communication.

ACHIEVEMENTS & CERTIFICATIONS

- Won 3rd Place at the Panimalar College Conference.
- Participated in the Saveetha Hackathon.
- Received an internship completion certificate from IIT Madras.
